## ABOUT

---

**Web development using React :** Solid grasp of React concepts including components, props, state, and lifecycle methods. Ability to integrate APIs into React projects. Proficiency in building interactive and dynamic user interfaces using React. Knowledge of React Router for handling navigation within single-page applications. I build awesome websites using:

- React: For dynamic and interactive interfaces.
- Bootstrap and Tailwind CSS: Ensuring sleek and consistent responsive designs.
- TypeScript: Adding reliability to the code.

**Backend development using Node.js and Express JS :** I specialize in building powerful server backends using:

- Express.js: A flexible framework simplifying API development and routing.
- Node.js: Providing a fast and scalable server environment.
- MongoDB: Efficiently managing data with a NoSQL database. Skills in working with databases, including MySQL, for data storage and retrieval.

## EDUCATION

---

### RCCIIT

B Tech Information Technology

2021 - 2025

## SKILLS

---

Frontend: HTML5, CSS3, JavaScript, Bootstrap, React, Angular JS, jQuery, Tailwind CSS  
Backend: Node.js, ExpressJS, MongoDB, PHP, MySQL  
Tools: Firebase, Git, Github, Vercel, WebStorm  
Languages: C, C++, Java

## PROJECTS

---

### DECOR - Interior-Company *HTML5, CSS3, JavaScript, Bootstrap, jQuery*

<https://anwsha2002.github.io/Decor-Interior-Company/>

Developed DECOR project using HTML5, CSS3, JavaScript, Bootstrap, and jQuery for a responsive web interface. Started with making appealing and user friendly UI design, utilizing Bootstrap for a responsive grid system. Implemented jQuery and JavaScript to enhance user interactions.

### CHIT-CHAT-HUB - Chatting Application *React, Typescript, Html5, Css3, Firebase, Tailwind-CSS*

<https://chit-chat-hub-anwsha2002.vercel.app/>

Chit-Chat-Hub is a feature-rich chatting application built with React, Firebase, and Tailwind CSS. Implemented the user interface with React. Leveraged Firebase for backend functionalities and real-time updates. Styled the application using HTML5, CSS3, and Tailwind CSS to ensure a visually appealing and responsive user experience.

### WEATHER-APP - Weather Forecast *Angular, Rest Api*

<https://weather-app-com.vercel.app/>

Weather-App is a user-friendly weather forecast application using Angular CLI, providing real-time weather information for various locations using integrated external weather APIs.

### IMAGE GALLERY - Gallery *React, Typescript, React-bootstrap, Html5, Css3*

<https://image-gallery-anwsha2002.vercel.app/>

Developed the Image Gallery project using React, Unsplash API, and React Bootstrap, creating an engaging image exploration platform. Dynamically fetched high-quality images through the Unsplash API and enhanced the visual appeal with React Bootstrap, ensuring a responsive image gallery experience.

### SHOPPIFY - E-Commerce *React, React-bootstrap, APIs, React-Router-Dom*

<https://shoppify-anwsha2002.vercel.app/>

Engineered the Shoppify e-commerce project with React, Typescript, HTML5, CSS3, and React Bootstrap. Implemented a robust "Add to Cart" functionality, allowing users to effortlessly add desired items to their shopping cart with a simple click. Utilized React Bootstrap to design a visually appealing cart view.
